

COMPLETING AN ASBESTOS CHAIN OF CUSTODY FORM

CONTACT INFORMATION

Complete your contact information by indicating your **Client** (Company) name, **Contact** name, **Address** and **Telephone** number.

MATRIX

Indicate the **matrix** the samples were collected on.

ANALYSES

Polarized Light Microscopy (**PLM**) is used in the asbestos analysis of bulk building materials.

Phase Contrast Microscopy (**PCM**) is used in the asbestos analysis of air samples.

Chatfield is a recommended method used for **vermiculite** insulation analysis.

Transmission Electron Microscopy (**TEM**) is used in the analysis of asbestos fibres in air and bulk at a high magnification. Paracel currently **subcontracts** this analysis.

SAMPLE ID

Specify the sample **identification/name** that you want us to report for your samples.

Each individual sample must have a **unique** identification and must match to what is written on the sampling bag.

PROJECT INFORMATION

If applicable, enter your **Project Reference** associated with your submission.

If you have received quoted pricing that applies to this submission, then enter the Paracel **Quote** number.

Enter a **PO#** if you require one for invoice processing.

Indicate the **Email** addresses of all contacts that require a copy of the report.

TURNAROUND TIME (TAT)

This is the time from when samples are received by Paracel to the reporting of your results.

Check off a **TAT** option **OR** be specific and indicate the actual **Date** you need your report.

EOD = End of (business) Day

REGULATORY GUIDELINE

To ensure your analytical requirements are met, please indicate the **provincial** regulatory guideline that your results will be based on.

MATERIALS TO BE ANALYZED

If you need to know the asbestos content of only a specific material(s) then **specify each material** to be analyzed. We will report a result for each material listed only.

If this is left **blank** OR if noted as **'All layers'**, Paracel will analyze and report each **separable** material identified during analysis as individual samples, at an additional cost.

ANALYSIS REQUIRED

Specify the analysis required for each sample submitted.

AIR VOLUME

Enter the total volume (**in litres**) of air drawn through the sampling media for your air samples.

SAMPLING DATE

Enter the **date** when the samples were collected.

TRUSTED.
RESPONSIVE.
RELIABLE.

10		<input type="checkbox"/>	<input type="checkbox"/>			

* If left blank, all lab identified distinct materials in each sample will be analyzed and reported separately, as per EPA 600/R-93/116. Additional charges will apply.

Multi-layered roofing and manufactured building materials will be analyzed as one sample, unless otherwise requested by client.

Submitting adequate sample volume is the responsibility of the client. Refer to the reverse of this CoC for recommended sample volumes. Signing this CoC authorizes Paracel to complete the analysis on the sample as submitted.

Comments:

Method of Delivery:

Unless otherwise negotiated by the parties, by signing Paracel's Chain of Custody form, you are agreeing to Paracel Laboratories Terms and Conditions and are subject to the terms and conditions thereof. Available at www.paracellabs.com

Date/Time:

Chain of Custody (Asbestos) - Rev. 6.0 August 2025

RELINQUISHED

Complete the Chain of Custody by **signing, printing** and indicating the **date** and **time** when you relinquish your samples to Paracel.

COMMENTS

Comment on any **additional information** that will assist us to effectively and correctly process your submission.

POSITIVE STOP

Within a sample group:

SMP- At the first **material** analyzed as asbestos containing (positive), analysis will **STOP** for **all remaining materials** in that group.

MAT- At the first of a **specific material** analyzed as positive, analysis will **STOP** for **that specific material only**. Analysis will continue for all other materials in that group. The process will apply to each subsequent specific material to be analyzed.
