

Paracel Laboratories Ltd. is pleased to present Element ClientConnect (ECC) to our clients; an online real-time interface which enables access to your analytical reports in a convenient and secure environment.

This form will designate you as an Administrator for your company. This person's responsibilities will include informing Paracel of any new user registrations or deletions to be made to ECC, managing requests and information in regards to ECC and acting as a point of contact in your office. By appointing one point of contact within your company, we believe this will enable Paracel to maintain better security to the site by limiting user information distribution and we appreciate your assistance with this protocol.
